Danish design and quality

- go hand in hand throughout the Anker collections. High grade sustainable teak produced to the highest standards of furniture and accessories for the perfect outdoor life. Great comfort and timeless DNA for you to mix and match and enjoy for years and years.

About the teak

We produce from the highest grade sustainable plantation teak wood. We use no chemistry to stain or treat the wood. This quality of teak wood can last for generations, even without any treatments and as such, is the very best natural material to use. We produce from carefully selected core wood, which we cut, shape and assemble with the utmost care, before finalising with our very own special sanding method for an ultra smooth finish. For metals we use the absolute highest standard of brass and stainless steel. For every product sold we also plant one tree through our collaboration with ONETREEPLANTED.
